

## Open house activities

---

Demonstrate the quality of your academic program

In case your brain is still in "spring break" mode... The purpose of this open house is to

5. "Another Brick in the Wall:" Academy students can paint one of the cinderblock "bricks" comprising the classroom wall. A QR code in the corner allows parents/visitors to hear that student's recorded narrative explaining the thought process behind their painting (Heather Denton).
6. Money management: Third and fourth graders explain how they are spending the year in an ongoing simulation; experiencing a lifetime of paying for an education, earning money, tithing, investing, paying bills and taxes, saving for retirement, and much more (John Linhares).
7. Scuba science: Seventh and eighth grade students explain the science of scuba diving safety (Rick Nelson).
8. Recorder karate: Students in primary grades demonstrate a group recorder rehearsal and how they earn recorder "belts" for achieving increasing levels of proficiency (Arthur Borges).
9. Build your own bubble wand: Kindergarten and first graders build 3D shapes out of gumdrops and toothpicks, then use them to create giant soap bubbles (Tammy Priest).
- 10.

Think about including a general activity that encourages people to visit each classroom.

Giving out different components for an egg drop container from each classroom is one such idea.
