

## Add five words to the media release

Updating your media release for social media use

If you are using the recommended media release form, or it's verbiage typed into another form, we are recommending you add five words which will allow you to post photos or videos to your school's social media accounts in addition to the school's website.

The entire text is listed here with the five new words in italics. You can add these words to your forms or copy and paste the entire paragraph. If you copy and paste the whole paragraph *please, please, please remove the italics.*
